

Symptom

My RoadMaster (Tripy electronic Road book) does not operate properly under some circumstances, or I do not have access to all the functions described in the user's manual.

Problem description.

You do not have the latest version of the programs and the procedure FAQ_MISE_A_JOUR_EN did not allow the downloading of the latest RoadMaster program.

Resolution

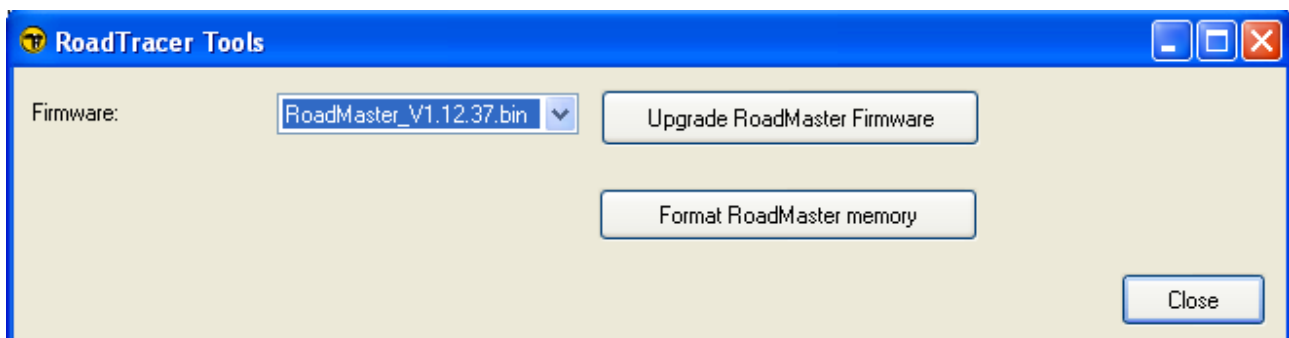

- 1) Ask the Technical support to provide you with the latest RoadMaster firmware updates. To do so, send an e-mail to support@tripy.be .
- 2) Save the .BIN file attached to the response e-mail in the following directory
My Documents\RoadTracer\roadmaster

- 2) Start
- 3) Select **Files -> Communication ...**

Press the **Tools** button

- 4) The latest downloaded versions is available from the pull-down list. Click on **Upgrade RoadMaster firmware**

The RoadMaster screen is partially blurred during the upgrade
